## Professional Summary

Full stack developer transitioning into cybersecurity, with the Google Cybersecurity Professional Certificate. Hands-on experience with access controls, API security, and local recovery of my own production application. Training in alert analysis and basic Splunk use. Bilingual experience in AI evaluation, team coordination, and documentation.

## Featured Project

### Pawsi | Application Development and Security | Sep 2025 – Present

- Winner of the Hackathon del Milagro, Salta, 2025. Built and published the web and Android application using React, TypeScript, Capacitor, and Supabase.
- Secured message notification delivery using database events, HMAC signatures, and duplicate prevention. Validated 23 local scenarios and confirmed Android delivery and rejection of unsigned requests in production.
- Applied least privilege in PostgreSQL: restricted message updates to read\_at and retained recipient-based access through RLS. Validated 15 local scenarios and effective permissions in production.
- Set up a Docker and WSL lab, performed a selective backup restore, compared record counts, and documented recovery limitations.

## Professional Experience

### AI Model Moderator & Squad Leader | Outlier | Aug 2024 – Present

Evaluated language, audio, and image models in English and Spanish. Coordinated a team of 10, focusing on quality and technical objectives.

### Copywriter | Texom Activity Company | 2022 – 2024

Created advertising and strategic copy for international agencies.

### Journalist | Radio 10, Canal 2, and other media | 2017 – 2022

Conducted research and live interviews, and synthesized information under deadline pressure.

## Technical Skills

Hands-on: PostgreSQL, SQL, RLS, API authentication, authorization testing, Docker, WSL, Git, Supabase, Cloudflare, JavaScript, TypeScript, React, and Python.

Foundations and training: OWASP Top 10, MITRE ATT&CK, alert triage, basic Splunk, networking, DNS, and incident response.

## Education and Certifications

Google Cybersecurity Professional Certificate — Google / Coursera. Completed.

Licenciatura in Communication Sciences — Universidad Nacional de Salta, 2024.

In progress: TryHackMe SOC Level 1. Preparing for CompTIA Security+ (SY0-701).
